

PROJECT PLAN — Catering Menu Web App (Streamlit)

1. Objective

Build a simple online catalog for your homemade catering service.

Customers can:

- Browse your food items neatly displayed with photos, prices, and descriptions.
- Choose quantity and add to cart.
- Send their selected items as a WhatsApp order message directly to you.

2. How It Works (Non-Tech Explanation)

- We'll host a **simple website** (no app installed needed).
- You'll send us your food list — name, description, price, image, category (veg/non-veg, snack, dessert, etc.).
- I'll update that list in a file (like your digital catalog book).
- When customers visit, they'll see your full menu.
- They can click to pick what they want, set quantity, and then press **“Send Order”** — which opens WhatsApp with their order ready to message you.
- You'll get the message instantly and can confirm or prepare the food.

5. Features

- ✓ Menu catalog with food image, name, description, price.
- ✓ Filter by category (e.g., breakfast, lunch, snacks).
- ✓ Quantity selector + “Add to Cart” option.
- ✓ WhatsApp order summary (auto message).
- ✓ Responsive layout (works on phone & laptop).
- ✓ Optional: “Daily Specials” or “New Items” section.

6. Pricing & Value

💰 **Development Cost:** ₹4,000–₹6,000 (one-time)

Includes:

- Design + setup + WhatsApp integration
- Hosting on Streamlit Cloud
- 1-month free updates to the menu
- Basic performance optimization

(Explain this to him directly:)

“Normally websites like this cost ₹15,000–₹25,000+, but since you’re just starting, I’m keeping it very affordable while still giving a high-quality online presence.”

Phase	Task	Duration
1	Collect menu data + images	1–2 days
2	Build Streamlit app	2–3 days
3	Test & host on Streamlit Cloud	1 day
4	Client handoff + small tweaks	1 day
Total: 4–6 days max.		

9. Maintenance Plan

- Future updates ₹500–₹700 per batch (optional).
- Hosting is free — no monthly fee.

You’ll get a simple online food catalog where customers can see your dishes, pick what they want, and send their order straight to your WhatsApp. No app, no website hosting headaches, just one link that works everywhere. You’ll look professional and customers can order easily.
